### A Practical Mobile Software Voice Solution

The mobile innovation inside the AccuSpeechMobile voice solution provides your distribution and IT operations a practical software solution for voice-enabling any of your distribution applications. All the voice functionality needed to support your distribution apps and simplified 'server-less' integration is powered solely from your mobile devices.

Mobile innovation has eliminated completely any need for expensive, complex server-based integration. Now your voice implementation, deployment and maintenance is a simplified and affordable approach, providing you all the control you need to exploit voice productivity quickly and efficiently as your business needs evolve.
